

Water Softening Systems

What is Scale?

Water supplies usually contain hardness minerals (calcium & magnesium). When these minerals are present in high levels, they form a hard whitish deposit called "scale". Scale builds up on bathroom and kitchen fixtures and creates problems in water heaters, washing machines, dishwashers, humidifiers, coffee makers and plumbing systems.

Softening Water - The Neotec Way!

Neotec Water Softeners eliminate hard water problems by filtering the calcium and magnesium through a resin media delivering soft, clean water for use. An automatic valve is used to draw salt to regenerate the resin periodically. Manufactured to the highest level of quality, Neotec Softeners are designed and built for reliable, consistent and trouble-free operation.

The Neotec Advantage!!!

Neotec Water Softeners have been built with YOU in mind. They are scientifically designed, easy-to-use & technologically advanced. Soft water delivered by Neotec Water Softeners makes a refreshing difference in your life in the following ways...

Laundry: Soft water reduces soap usage by up to 70% and protects your washing machine too! *Saves on Soap!*

Clothes: Clothes come out cleaner, fresher & brighter. *Protects your clothes!*

Dishes: No streaks, stains or spots on glassware and utensils. Helps your dishwasher last longer too. *Cleaner Dishes!*

Plumbing: Soft water will not deposit scale on your plumbing fixtures and pipes. *No Clogging of Pipes!*

Hot Water: A water heater that has scale on the heating element requires additional energy to heat the water. A water softener will prevent scale formation resulting in energy savings of up to 20%. *Saves on Energy Costs!*

Face Saver: Soft water will reduce razor-burn as your razor glides smoothly over the face. *Saves on razor costs, protect your face!*

No Stains: When you use soft water, you don't have staining, mineral build-up or unsightly rings on your bathroom fixtures. *No Stains!*

Hair: Soft water helps your hair retain luster and color. *Protects Your Hair!*

WATER SOFTENER MODELS

Timer Model

This automatic control unit will regenerate the resin bed every pre-set number of days.

Metered Model

This unit monitors the water usage and regenerates after a pre-determined volume of water passes.

Electronic Model

Displays water usage & time. Retains settings even after power loss. Programmable holiday settings feature.

Standard Style

Thermally insulated white standard plastic jacket.

Compact Cabinet Style

Space-saving unit houses resin and brine tank in a single module.

Technical Specifications

NEOTEC Softener Code	Capacity (Grains)	Backwash Flow Rate	Resin Tank Size	Resin cu. Ft.	Brine Tank Size	Shipping Weight (lbs)	Salt Setting (lbs)
NTS/NDS/NDSE30	30,000	2.0 usgpm	9" x 48"	1.00	18" x 33"	80	10
